PREFACE.

IF any Thing could have escaped the Censures of this litigious Age; if the most innocent inoffensive Set of Men in the World could be free from Satyr and Sarcasm, one would have thought the Ancient and Noble Society of Free-Masons should have been the Men. What have they not to recommend them to the World, and gain the Favour and Protection of wise and honest Men?

As their Art is the most Ancient, so their Profession of it is most Honourable. The Necessity the World was early in of the Profession of a Mason, proves their Usefulness; for I believe it will not be doubted, that Men had Houses before they had Cloaths, as they had Altars before they had Temples. Cain built a City, and Abel, no doubt, built an Altar, when he offered his Sacrifice to the LORD.

THUS useful, and thus ancient, it cannot be wondered if the World honour'd them with all the Tokens of Respect, which in those Days they were capable of, and perhaps more than we have yet an Account of.

THESE Honours, and this Respect, it cannot be doubted brought Men of Value among them, who thought it not below them to wear the Badge of the Society, and to acknowledge themselves to be Favourers of their Greatness, as they were Lovers of Art.

UNDER the Protection of such Persons of Honour and Interest, it is not to be express'd what mighty Fabricks they have erected, what glorious Buildings they have rais'd, from the Temple of Solomon to the magnificent Pile of St. Peter's at Rome.

HOW this Society has been preserv'd; How regularly they have acted; on what wholesome Laws they have been founded, and how carefully they have observ'd and regarded those Laws, as the just Cement of the Society, that is partly to be seen in this Tract, and it will speak for itself.

NOR is their Value lessen'd or abated at all by the Dust and Scandal rais'd by any Men against them, or by the Freedom they have taken to banter and rally them. The Dirt thrown at them flyes back on those that cast it, and the Honour of the Society of Free-Masons remains entire. So that none of the Persons of Honour who have lately grac'd the Society with their Presence, have yet seen any Reason to be asham'd of them, or to withdraw their Protection from them.

MUCH more might be said to their Honour, but the following Piece of Antiquity is sufficient, and will give every Reader an Authentick Account of them. It has yet seen the World but in Fragments, but is now put together as a Thing of too much Significancy to pass our Observation, and which will effectually vindicate the Ancient Society of Free-Masons from all that has or can be said against them.

HISTORY

OF

Free Masons, &c.

The Almighty Father of Heaven, with the Wisdom of the Glorious Son, thro' the Goodness of the Holy Ghost, Three Persons in one Godhead, be with our Beginning, and give us his Grace so to govern our Lives, that we may come to his Bliss, that never shall have end. Amen.

G O O D Brethren and Fellows, our Purpose is to tell you how, and in what manner the Craft of Masonry was begun, and afterwards how it was founded by worthy Kings and Princes, and other wise Men, hurtful to none, and also to them that be true, we will declare doth belong to every *Free Mason* to keep firm good Faith, if you take Heed thereunto it is well worthy to be kept, which is contain'd in the Seven Liberal Sciences as follows, *viz*.

Imprimis, It's Grammar that teaches a Man to speak truly, and write truly.

II. It's *Rhetorick* that teaches a Man to speak fair, and in subtle Terms.

III. It's *Logick* that teaches a Man to discern Truth from Falshood.

IV. It's *Arithmetick* that teaches a Man to Accompt, and reckon all manner of Numbers.

V. It's *Geometry* that teaches Mett and Measure of any Thing, and from thence cometh *Masonry*.

VI. It's Musick that teacheth Song and Voice.

VII. It's *Astronomy* which teacheth to know the Course of the Sun, Moon, and other Ornaments of Heaven.

Note, I pray you, That these Seven are contain'd under Geometry, for it teacheth Mett and Measure, Ponderation and Weight for every Thing in and upon the whole Earth for you to know; that every Craftsman works by Measure; He or She that buys or sells, is by Weight or Measure; Husbandmen, Navigators, Planters, and all of them, use Geometry; for neither Grammar, Rhetorick, Logick, nor any other of the said Sciences can subsist without Geometry, ergo, most worthy and honourable.

You ask me how this Science was invented; my Answer is this, That before the General Deluge, which is commonly called *Noah's* Flood, there was a Man called *Lamech*, as you may read in the Fourth Chapter of *Genesis*, who had two Wives, the one called *Ada*, the other *Zilla*; by *Ada* he begat two Sons, *Jabal* and *Jubal*; by *Zilla* he had one Son called *Tubal*, and a Daughter called *Naamah*. These four Children found the beginning of all Crafts in the World: *Jabal* found out *Geometry*, and he divided Flocks of Sheep, and Lands; he first built a House of Stone and Timber. *Jubal* found out *Musick*; *Tubal* found out the Smith's Trade or Craft, also of Gold, Silver, Copper, Iron and Steel; *Naamah* found out the Craft of Weaving. And these Children

knew that GOD would take Vengeance for Sins, either by Fire or Water, wherefore they did write there Sciences, that they had found, on two Pillars of Stone, that they might be found after that GOD had taken Vengeance; the one was Marble, that would not burn, the other was Latress1, that would not drown in Water; so that the one would be preserved, and not consumed, if GOD would any People should live upon the Earth. It resteth now to tell you how these Stones were found, whereon the said Sciences were written, after the said Deluge: It so pleased God Almighty, that the Great Hermarmes², whose Son Lunie was, who was the Son of Sem, who was the Son of Noah. The said Hermarmes was afterwards called Hermes, the Father of Lunie, he found one of the two Pillars of Stone. He found these Sciences written thereon, and taught them to other Men. And at the Tower of Babylon, Masonry was much made on; for the King of Babylon, who was Nemorth³, was a Mason, and serv'd the Science; and when the City of Ninevah, and other Cities of the East, should be built, Nemorth sent thither Threescore Masons, at the Desire of the King of Ninevah; and when they went forth, he gave them a Charge after this manner, That they should be true one to another, and love one another, that he might have Worship by them in sending them to his Cozen the King. He also gave them Charge concerning their Science; and then it was the first time that any Mason had Charge of his Work. Also Abraham, and Sarah his Wife, went into Egypt, and taught the Egyptians the Seven Liberal Sciences; and he had an ingenious Schollar called Euclydes, who perfectly learned the said Liberal

It happen'd in his Days, the Lords and States of the Realm had so many Sons unlawfully begotten by other Men's Wives, that the Land was burthen'd with them, having small Means to maintain them withal; the King understanding thereof, caused a Parliament to be called or summoned for Redress, but being so Numberless that no Good could be done with them, he caused Proclamation to be made through the Realm, that if any Man could devise any Course how to maintain them, to inform the King, and he should be well rewarded; whereupon *Euclydes* came to the King, and said thus, My noble Sovereign, if I may have the Order of Government of those Lords Sons, I will teach them the Seven Liberal Sciences, whereby they may live honestly like Gentlemen, provided that you will grant me Power over them by virtue of your Dominion; which was immediately effected, and there *Euclydes* gave them those Admonitions following

I. To be true to their King.

II. To be true to the Master they serve.

III. To be true, and love one another.

IV. Not to miscall one another, &c.

V. To do their Work so duly, that they may deserve their Wages at their Master's Hands.

VI. To ordain the wisest of them Master of the rest of the Work.

VII. To have such reasonable Wages, that the Workman may live honestly, and with Credit

VIII. To come and assemble together in the Year, to take Council in their Craft how they may work best to serve their Lord and Master, for his Profit, and their own Credit, and to correct such as have offended.

Note, That Masonry was heretofore term'd Geometry, and sithence the Children of Israel came to the Land of Bethest, which is now called Emens, in the Country of Jerusalem, where they began a Temple, which is now called the Temple of Jerusalem: And King David loved Masons well and cherish'd them, for he gave them good Payment, and gave them a Charge, as Euclydes had given them before in Egypt, and further, as hereafter followeth; and after the Decease of King David, Solomon his Son finished the Temple that his Father had began; he sent for Masons of divers Nations, to the Number of Four and Twenty Thousand, of which Number Four Thousand were elected and created Masters and Governors of the Work. And there was a King of another Region or Country, called Hiram, who loved well King Solomon, and he gave him Timber for the Work; and he had a Son called Amon, and he was Master of

Geometry, and he was chief Master of all his Masons of Carving-Work, and of all other Work of Masonry that belong'd to the Temple, as appears by the Bible in Lib. Regum Cap. 4. And King Solomon confirmed all Things concerning Masons that David his Father had given in Charge; and then Masons did travel divers Countries, some to augment their Knowledge in the said Art, and to instruct others.

And it happen'd that a curious *Mason* named *Memongrecus*, that had been at the building of *Solomon's* Temple, came into *France*, and taught the Science of *Masonry* to the *Frenchmen*; and there was a King of *France* called *Carolus Martel*, who loved greatly *Masonry*, who sent for the said *Memongrecus*, and learned of him the said Sciences, and became one of the Fraternity; and thereupon began great Works, and liberally did pay his Workmen: He confirm'd unto them a large Charter, and was yearly present at their Assembly, which was a great Honour and Encouragement unto them; and thus came the Science into *France*.

The Knowledge of *Masonry* was unknown in *England* until St. *Alban* came thither, who instructed the King in the said Science of *Masonry*, and also in Divinity, who was a *Pagan*: He walled the Town now called St. *Alban*; he became in high Favour with the King, insomuch that he was Knighted, and made the King's Chief Steward, and the Realm was governed by him under the said King. He greatly cherished and loved *Masons*, and truly paid them their Wages Weekly, which was 3 s. 6 d. the Week. He also purchased for them a Charter from the King to hold a General Assembly and Council Yearly. He made many *Masons* and gave them such a Charge as is hereafter declared.

It happen'd presently after the Martyrdom of St. Alban, who is truly term'd England's Proto-Martyr, that a certain King invaded the Land, and destroy'd most of the natives by Fire and Sword, that the Science of Masonry was much decay'd, until the Reign of King Athelston, which some write Adleston, who brought the Land to Peace and Rest, from the insulting Danes. He began to build many Abbies, Monasteries, and other Religious Houses, as also Castles and divers Fortresses for Defence of his realm. He loved Masons more than his Father; he greatly studied Geometry, and sent into many Lands for Men expert in the Science. He gave them a very large Charter, to hold a Yearly Assembly, and Power to correct Offenders in the said Science; and the King himself caused a General Assembly of all Masons in his Realm, at York, and there made many Masons, and gave them a deep Charge for Observation of all such Articles as belonged unto Masonry, and delivered them the said Charter to keep: and when this Assembly was gathered together, he caused a Cry to be made, that if any of them had any Writing that did concern Masonry, or could inform the King of any Thing or Matter that was wanting in the said Charge already delivered, that they or he should shew them to the King, or recite them to him; and there were some in French, some in Greek, and some in English, and other Languages, whereupon the King caused a Book to be made, which declared how the Science was first invented, and the Utility thereof, which Book he commanded to be read, and plainly declared, when any Man was to be made a Mason that he might fully understand what Articles, Rules and Orders he was obliged to observe; and from that time unto this Day Masonry hath been much respected and preserved, and divers new Articles have been added to the said Charge, by good Advice and Consent of the Masters and Fellows.
